

## Abstract guidelines for BotrySclero 2022

- Abstracts must be written in English using Calibri characters and single line spacing.
- Title (Calibri, 14 pts, bold, centre-justified): Limited to 200 characters including spaces (only the first character in the sentence is capitalized, except for specific rules).
- Authors (Calibri 12 pts, centre-justified): Use full first name and last name of all authors. Underline the corresponding author.
- Affiliation(s) (Calibri 12 pts, italics, centre-justified): Insert name of institution, department, city and country.
- Insert email of the presenting author (Calibri 12 pts, centre-justified):
- Abstract body (Calibri, 12 pts, left and right-justified): Limited to 2500 characters including spaces. Please, try to include a clear statement of the objectives of the study, a brief statement of the methodology (if relevant), a summary of the results and a general conclusion.
- Use standard abbreviations for units of measure. Other abbreviations must be defined upon first use.
- Please, do not include tables, charts or other graphics.
- A maximum of three references can be included in the body of text as “(Surname et al. Year, *Journal*, Volume, Pages)”.
- Please, proofread carefully for formatting and spelling.
- **Name your file according to the following format: BotrySclero2022\_Surname of the presenting author.doc**

*Example:*

### **Looking forward to meeting the *Sclerotinia* and *Botrytis* researchers in Avignon**
